National Security Study Memorandum 116

TO: The Secretary of State
 The Secretary of Defense
 The Director of Central Intelligence

SUBJECT: Policy Toward Greece

The President has directed a review of progress in executing the decisions made by him in June 1969 in connection with the resumption of full military shipments to Greece. The principal question to be addressed is what options the U.S. now has vis-a-vis Greece in the light of recent developments there.

A paper should be prepared in the NSCIG/NEA and submitted to the Senior Review Group by January 29, 1971.
